

VINTAGE & CLASSIC RADIATORS

With over 75 years of vintage radiator manufacturing experience, these Adrad cores are made using original manufacturing equipment to produce full copper *Hexagonal* and *Cellular* style cores. The cores are full-face-solder-dipped to produce an authentic and exact fit replacement radiator for your Vintage requirements.

Restoring a vintage or classic vehicle can be frustrating.

Getting the right parts makes all the difference to achieve reliable performance whilst maintaining the vehicle's "original" condition to maximise its value.

Need an authentic radiator for a 1928 Chevrolet?

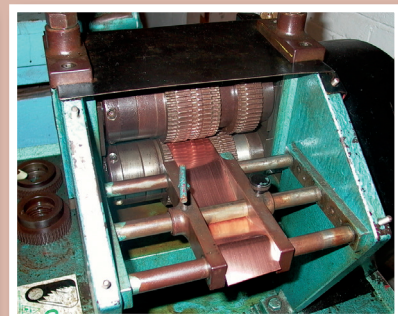

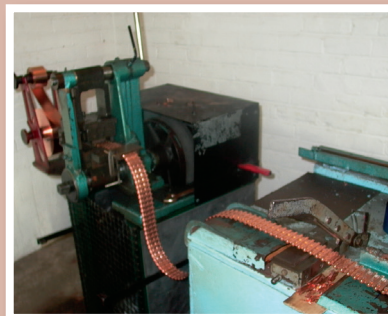

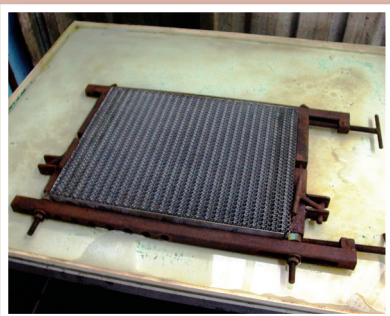

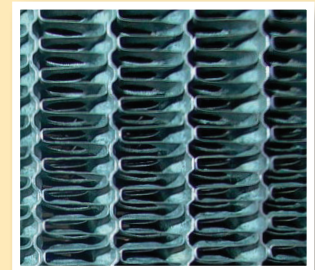

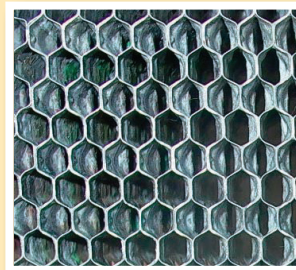

We can supply from stock.

Rare or unique size and shape?

We can custom make to your specifications.

- Full Copper / Solder Face Dipped
- Custom Made for a Perfect Fit
- Square, Curved or V-Shaped
- With or without Crank Hole
- Hexagon or Cellular

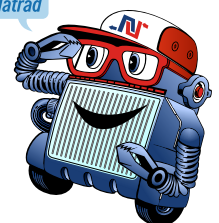

Call your local Natrad workshop to discuss your individual requirements and to source authentic vintage or classic style, hand-crafted radiators.
