

# NEW RANGE

## PERFORMANCE & PRECISION

Optibelt are a leading global manufacturer of high performance drive belts. Optibelt create drive solutions with durability & OE quality that will meet the demands of your customers.

**AVAILABLE FOR ALL VEHICLES  
EUROPEAN, JAPANESE, KOREAN & AUSTRALIAN**

### RIBBED BELTS

The optibelt RBK is a high performance ribbed belt for all standard ancillary drives in passenger cars.

Even under environmental influences such as dust, moisture and extreme temps, the RBK provides for secure and silent power transmission. Whether combined with modern tensioning systems or as elastic ribbed belt, the ribbed belt achieves the highest level of operational performance.

### TIMING BELTS

The optibelt ZRK timing belt consistently delivers optimum power transmission after thousands of operating hours. Sophisticated material combination provides silent and versatile control of engine components.

Advanced materials and superior construction provide high tensile strength and stability with resistance to abrasion and temperature variations.

### V BELTS

With a raw, moulded edge, optibelt V-belts are a cost effective option suitable for use in passenger car engines.

V-belts require little maintenance, and will run smoothly in even small pulley diameter applications such as alternators, water pumps, air conditioning compressors or power steering.

### TIMING BELT KITS

Using an Optibelt kit when replacing timing belts will ensure that components remain consistent for the safety & optimal economy of a flawless drive system.

## UNIQUE FEATURE: WEAR INDICATORS

- Prevent Undesirable Failures
- High Temp. Resistance with EPDM Rubber
- Service/Replace the Belt at the Right Time

The Optibelt RBK Secured Change Control v-ribbed belt wears to reveal red rubber markings when the belt reaches the end of its service life. This means you can check for wear without needing mechanical tools.
